Professional Summary

Frontend Developer with over 5 years of experience specializing in HTML, CSS, JavaScript, React, Next.js, and Django. Proficient in building dynamic, user-friendly, and responsive web applications and e-commerce platforms. Skilled in WordPress development and experienced in collaborating with diverse teams to deliver high-quality projects. Holds a Bachelor's Degree in Electrical Engineering, combining technical problem-solving skills with a creative passion for frontend development.

Work Experience

Accountant/Flight Ticketer

Company: Giftnuels Travels and Tours may 2024 – Nov 2024

- Utilized various tools to create and manage spreadsheets, Google Sheets, and other documents for accounting purposes.

- As a ticketing agent, booked flights and made travel reservations for clients, including arranging hotel accommodations when required.

- In the accounting role, ensured the accuracy of all financial records and conducted regular audits to maintain balanced accounts.

Assistant Frontend Developer

Company: Threndin community March 2023 – Jan 2024

- Assisted in designing, developing, and optimizing frontend features for web applications using React and Next.js.

- Enhanced user interfaces to ensure a seamless user experience and cross-browser compatibility.

- Worked with WordPress to create and customize client websites.

Senior Frontend Developer

Company: LEAD Software Community January 2021 – March 2023

- Led frontend development efforts, building high-performance web applications with React and Next.js.

- Integrated backend services using Django and REST APIs to create scalable applications.

- Mentored junior developers, fostering growth and ensuring adherence to best practices in coding.

Junior Developer

Company: Leads
January 2019 – December 2021

- Contributed to the development of multiple projects with a focus on responsive web design using React, HTML, and CSS.

- Supported the team in maintaining and enhancing e-commerce websites.

- Collaborated with backend developers to optimize data flow and user interaction.

Web Development Intern

Company: Leads
January 2018 – December 2018

- Built an e-commerce website from scratch using React and JavaScript.

- Assisted senior developers in debugging and improving web applications.

- Gained hands-on experience in project management and agile development workflows.
